February 6, 2017

United States President Donald J. Trump
The White House
1600 Pennsylvania Avenue
Washington, DC 20500

Dear President Trump:

The U.S. food and agricultural sector looks forward to working with your Administration to create new jobs and spur economic growth for all Americans.

The Asia-Pacific region is the world’s largest market for food and agriculture and is expected to grow rapidly in the years ahead. Reducing and eliminating tariffs and other restrictive agricultural policies in this region will help American workers in our sector compete, creating an opportunity to supply Asian markets with high-quality food and agricultural goods.

We hope your Administration will create such opportunities for our sector by deepening U.S. economic engagement in this critical region while responding to the Asia-only regional trade agreements being negotiated by our foreign competitors. While many in our sector strongly supported the Trans-Pacific Partnership, we hope future agreements build upon the valuable aspects of that agreement to increase our market access in the Asia-Pacific. We welcome an opportunity to work with your Administration to ensure that America’s farmers, ranchers, processors and food companies do not fall behind our foreign peers in this vitally important economic region.

Economic growth in America’s heartland is inextricably linked to the long-established productivity of U.S. food and agriculture—an industry that is a true American success story. The food and agricultural industry from farm to fork employs more than 15 million Americans. The U.S. food and beverage industry alone represents 12 percent of all U.S. manufacturing jobs, making it the largest employer in the manufacturing sector. Our industry has improved the nutrition and economic wellbeing of generations of American families and is one of our nation’s most efficient and competitive industries.

America’s food and agriculture sector is poised to grow internationally, building upon its well-deserved reputation for high quality products, trusted brands and constant innovation. Our ability to continue to create jobs and support economic growth in rural America depends on maintaining and increasing access to markets outside the United States through existing and future trade agreements. With more than 95 percent of our potential customers living outside our borders, expanding access to international markets is essential for our future success. The Asia-Pacific region is one such market that is critical if we are to attain our future export potential.
We are proud of our ability to create the safest, most innovative, abundant, and affordable food supply in the world. We look forward to working with your team to preserve and expand upon the gains our sector has already achieved by promoting U.S. food and agriculture at home and abroad and expanding market access for our sector.

Sincerely,

Agri Beef Co.
